

# Static (Mathieu Koss Remix)

## Cazzette

Been drifting thousand miles an hour into hope  
We're missing every ounce of power that we've owned  
When there's nothing left to say, we'll run  
Chasing every breath away, oh  
Did me made far this to break, oh come undone  
I know everything was built to fall  
We will fall together  
I know we said that we could change so easily  
But when I'm moving, yeah we've been here before  
Who we're fooling? What are we waiting for?  
'Cause we're now moving, yeah we've been here before  
Who we're fooling? What are we waiting for? You find this the only dream that I've been drawn  
at  
Don't get hide in, every each of you [?]  
Now, these things you let me bear for too long  
So now you think it was there, I was wrong  
Diving into deep to care, oh oh ooh  
I know everything was built to fall  
We will fall together  
I know we said that we could change so easily  
I don't, don't believe in love no more  
I thought we could be better  
I know we said that we could change so easily  
But we're not moving, yeah we've been here before  
Who we're fooling? What are we waiting for?  
'Cause we're not moving, yeah we've been here before  
Who we're fooling? What are we waiting for?  
Yeah, we've been here before.
