

Summertime

My Chemical Romance

When the lights go out
Will you take me with you?
And carry all this broken bone
Through six years down in crowded rooms
And highways I call home
Is something I can't know till now
Till you pick me off the ground
With brick in hand, your lip gloss smile
Your scraped-up knees and If you stay
I would even wait all night
Or until my heart explodes
How long?
Until we find our way
In the dark and out of harm
You can runaway with me
Anytime you want Terrified of what I'd be
As a kid from what I've seen
Every single day when people try
And put the pieces back together
Just to smash them down
Turn my headphones up real loud I don't think I need them now
Cause you stop the noise and If you stay
I would even wait all night
Or until my heart explodes
How long?
Until we find our way
In the dark and out of harm You can runaway with me
Anytime you want
Well anytime you want
Don't walk away
Cause if you stay
I would even wait all night
Well or until my heart explodes
How long?
Until we find our way
In the dark and out of harm
You can runaway with me
You can write it on your arm
You can run away with me
Anytime you want
