

The First Time

Ella Henderson

Somebody told me they saw you with her
They even called her my name
Thinking I was that girl
She wears the same kind of makeup and the same color hair
Well she's a wannabe me and she's even got it down to the clothes I wear
See you can try to replace me
And start all over again
But what you just don't understand You had it right the first time
But you went and said it's fine
I gave you all of me
So you had no reason to think twice
You had it right the first time
But you were so blind
Cause there'll never be no better me to find
You had it right the first time
She can wear the same perfume
And she can hold your hand
Yeah she can make you smile
But not the way that I can
I hope she doesn't get used to being so attached
Cause she will never be me no so it just won't last So you can try to up rank me
Yeah you can dream like that
But you might as well face the facts You had it right the first time
But you went and said it's fine
I gave you all of me
So you had no reason to think twice
You had it right the first time
But you were so blind
Cause there'll never be no better me to find
You can keep searching around
Thinking that we're all the same
But I'll always be the best you found
And that's one thing that just won't change
There'll never be no better me
Oh no,
No there'll never be no better me
Oh no You had it right the first time
But you went and said it's fine
I gave you all of me
So you had no reason to think twice
You had it right the first time
But you were so blind

Cause there'll never be no better me to find
No, there'll never be no better me to find
And now I gotta tell you there'll never be no better me to find
You had it right the first time
