

This Town Is Killing Me

Caitlyn Smith

I pour my heart out
Three minutes at a time on a J-45 and no one's listening
Too busy drinking on the company tab
I scream my lungs out
Confess my secrets, own my sins, but they don't give a damn
Cause if it don't sound like the radio, pass Nashville you win
You're steel guitars and broken hearts have done me in
I gave you my soul
Cause I wanted it so bad and now I just wanna go home
This town is killing me
This town is killing me
They buried my grandad without me
Cause I was out on the road at some one off show in Tupelo
And I can't take that one back
I was in love once
And I pushed him away and the price I pay is a whole lot of lonely nights
And a whole lot of songs that never see the light Nashville you win
You're steel guitars and broken hearts have done me in
I gave you my soul
Cause I wanted it so bad and now I just wanna go home
This town is killing me
This town is killing me
Oh, this town is killing me
This town is killing me
Nashville you win
Cause I'll wake up here tomorrow and do it all over again
Even though you're killing me
This town is killing me
This town is killing me
