

Bob Dylan

Nine Days

Bobby's in the basement making his movie
He paints a little picture but not to be cheesy
He wants this little girl to believe in him easy
Bristles to the canvas imagining he feels high, mmmInspiration of my heart search for light out
of the dark
All the pictures in my heart lie awake there in my fog
This oasis in my arms I approach it with disarm
Though it might do me some harm stop to catch me if I fallBobby's in the basement making his
music
He never won't stop though not to abuse it
If there's some other way that they only would use it
He lives another day but they always refuse itLacerations of my heart
Dropped down in pieces in the dark
Mixed the words up on this page
Makes the purple turn to beige
Inspiration of my heart search for light out of the dark
All the pictures in my heart lie awake there in my fog
This oasis in my arms I approach it with disarm
Though it might do me some harm
So stop to catch me if I fallIt's just like Bob Dylan says...Stop depression of my own walk the
only road I know
If I am only dreamin' then I am not that far from it
Sow the strength that grows from seeds worship creativity
If I am only dreamin' then me an' Bob are not that far today
So long as I'm young
Bobby's in the basement making his musicI search the beaches walk the sand
I cut my feet on broken glass
Strap the sandals on my feet
I'm run down but I still hit the street
Inspiration of my heart search for light out of the dark
All the pictures in my heart lie awake there in my fogIt's just like Bob Dylan says...Stop
depression of my own walk the only road I know
If I am only dreamin' then I am not that far from it
Sow the strength that grows from seeds worship creativity
If I am only dreamin' then me an' Bob are not that far today
So long as I'm young
So long as I'm young, mmmBobby's in the basement making his movie
He paints a little picture but not to be cheesy
He wants this little girl to believe in him easy
Bristles to the canvas imagining he feels high, high
Inspiration of my heart

Desperation of my heart, mmm, mmm
