In Common

[Alicia Keys](#)

Said I'd be gone by five
But it's sun rise and I'm still in your bed
Goodnight usually means goodbye
Me re-playing memories in my head
Look at you, look at you
Look what you made me do
How do you, how do you? Faith know my every move
Who are you? Who are you? You look so familiar
I know you, I know you, baby, I know the truthWe got way too much in common
If I'm being honest with you
We got way too much in common
Since I'm being honest with you
Who wants to love somebody like me?
You wanna love somebody like me?
If you could love somebody like me
You must be messed up too
Who wants to love somebody like me?
You wanna love somebody like me?
If you could love somebody like me
You must be messed up tooWe used to talk 'til midnight
All those days that you stayed at my house
We were just passing the time
When we were young and we ain't had no vows
Now, now, now maybe later on, I'll text you and maybe you'll reply
We both know we had no patience together day and night
Getting high on our supply, yeah, we ain't satisfied
I could love you all occasions
We got way too much in common
If I'm being honest with you
We got way too much in common
Since I'm being honest with youWho wants to love somebody like me?
You wanna love somebody like me?
If you could love somebody like me
You must be messed up too
Who wants to love somebody like me?
You wanna love somebody like me?
If you could love somebody like me
You must be messed up tooMessed up too, messed up too
Just like you, just like you
Messed up too, messed up too
Just like you, just like youWe got way too much in common
If I'm being honest with you

We got way too much in common
Since I'm being honest with youWho wants to love somebody like me?
You wanna love somebody like me?
If you could love somebody like me
You must be messed up too
Who wants to love somebody like me?
You wanna love somebody like me?
If you could love somebody like me
You must be messed up too
