

# Better Than We Found It

[Maren Morris](#)

That's what they yell when I open my mouth  
A stick is a stick, a stone is a stone  
But who's gonna care if I don't? Who's gonna change if I won't? When time turns this moment to  
dust  
I just hope that I'm proud of the woman I was  
When lines of tomorrow are drawn  
Can I live with the side that I chose to be on?  
Will we sit on our hands, do nothin' about it?  
Or will we leave this world better than we found it?  
Over and under, and above the law  
My neighbor's in danger, who does he call?  
When the wolves at the door are covered in blue  
Shouldn't we try somethin' new?  
We're over the barrel and at the end of one too When time turns this moment to dust  
I just hope that I'm proud of the woman I was  
When lines of tomorrow are drawn  
Can I live with the side that I chose to be on?  
Will we sit on our hands, do nothin' about it?  
Or will we leave this world better than we found it? America, America, divided we fall  
America, America, God save us all  
From ourselves and the hell that we've build for our kids  
America, America, we're better than this  
When time turns this moment to dust  
I just hope my son's proud of the woman I was  
When lines of tomorrow are drawn  
Can I live with the side that I chose to be on?  
Will we sit on our hands, do nothin' about it?  
Can we leave this world better than we found it? America, America
