

# Priorities

Jillian Jacqueline

I haven't looked in your eyes in a long time  
I haven't looked like I should  
I've been too busy checking all the boxes  
Tryna win, trying to be good  
Under the spell of what  
we think we want  
But in the end it's only us  
It's just a matter of time now, honey  
Before we lose all our looks and money  
So let's get rid of the rest of the story  
You and me, priorities  
Forget about spinning that wheel of fortune  
It's gonna stop without warning  
As long as I got your love in the morning  
You and me, priorities  
You and me, priorities  
Yeah, I forgot how to live in the moment  
You forgot how to unwind  
When did the future get so damn important?  
When we could die at any time  
I wanna know what it's like  
To have only you on my mind  
It's just a matter of time now, honey  
Before we lose all our looks and money  
So let's get rid of the rest of the story  
You and me, priorities  
Forget about spinning that wheel of fortune  
It's gonna stop without warning  
As long as I got your love in the morning  
You and me, priorities  
You and me, priorities  
To the top of my list is where you're going, babe  
To the front of my mind, yeah, you're gonna stay  
Let's put all our time into time this way  
Make you and me priorities  
It's just a matter of time now, honey  
Before we lose all our looks and money  
So let's get rid of the rest of the story  
You and me, priorities  
Forget about spinning that wheel of fortune  
It's gonna stop without warning  
As long as I got your love in the morning  
You and me, priorities  
You and me, priorities  
You and me, priorities
