Crystal Express

Raury

Life is in the moment And life is incoherent And life is a thing that you chose to have inherent You came here for a reason But you can not remember it, yeah And you might be frustrated Might be confused and hyperventilated Worried about the future Pull up to the station And climb up on the crystal express As we, as we run Days and stormy nights Pray we'll find a way to the sun Cause you give me life Give it all before it's gone And I'll give you life Give you everything and more And you give me life Is it all we need and want And I'll give you life And we all, we all, we all need light Follow me my brother Talk to me my sister We can go wherever And we can live forever As we find illumination Right up on the crystal express We can face some problems Trials and tribulations Diamonds are for heating constant pressure for creation You be at your true nirvana You can ride the crystal express As we, as we run Days and stormy nights Pray we'll find our way to be one Cause you give me life Give it all before it's gone And I'll give you life Give you everything and more And you give me life Is it all we need and want

And I'll give you life

And we all, we all, we all need light
