

Footprints on the Moon

Tracy Lawrence

Ooh, ooh, yeah, yeah
Let's catch a ride on the shooting star
We wave goodbye when we pass mars
When it comes for loving you
The sky 'aint the limit cause there's footprints on the moon
Ooh, ooh, yeah
Hey girl you got my head in the clouds tonight
'aint nothing bring me down cause you got me up so high
No even gravity got a chance to hold back you and me
Let see how far this love will let us go
That kiss on your lips that touch on your fingers
You and me we got a million miles to go so
Let's catch a ride on the shooting star
We wave goodbye when we pass mars
Cause when it comes for loving you
The sky 'aint the limit cause there's footprints on the moon
Ooh, ooh, yeah
How need the sunshine when I got the light from your eyes
How need this little town when we got the keys to the sky
Gonna take you to another world
And show you you're the only girl
That I wanna give all of my love to
Let's catch a ride on the shooting star
We wave goodbye when we pass mars
Cause when it comes for loving you
The sky 'aint the limit cause there's footprints on the moon
I'm gonna blow your heart away
Slow dancing on the milky way
Ooh, ooh, ooh yeah
Let's catch a ride on the shooting star
We wave goodbye when we pass mars
Cause when it comes for loving you
The sky 'aint the limit cause there's footprints on the moon
Ooh, ooh, ooh, yeah
No even gravity got a chance to hold back you and me
Let see how far this love will let us go
That kiss on your lips that touch on your fingers
You and me we got a million miles to go so
Let's catch a ride on the shooting star
Wave goodbye when we pass mars
The sky 'aint the limit cause there's footprints on the moon

Ooh, ooh, ooh, yeah, yeah
