

Tiny Little Robots

Cage the Elephant

They've got you movin' to the city Oh my, you think you're lookin' pretty
But they've got their pistols too
Tucked down beneath their shoe
It's a new sensation World annihilation
Moving to the music
Patiently it's waitin'
The city's screamin'
I can hear them breathin'
Cryin' out for wisdom
Hungry minds are feedin'
And I know that you're tired of this
'Cause you're a robot
They designed your life
But true souls said you know what's right
And you can join us on the other side
Are you scared? Are you scared?
Are you scared?
They've got you marching to a drum beat Oh, my, you got another nose bleed
They'll keep you so amused
You'll never taste the truth
It's a new creation
Total domination
Chains across your shoulders
Social captivation
Kill our leaders
Persecute our teachers
Criticize our culture
Crucify free thinkers
I know that you're tired of this
'Cause you're a robot
They designed your life
But true souls said you know what's right
And you can join us on the other side
Are you scared? Are you scared?
Are you scared?
Fill our eyes with money Vanity that's cunnin' Only on the surface
Diamonds look so stunnin'
Mass deception
Altered our perception
Sold it to the children
Made a new connection
And I know that you're tired of this

'Cause you're a robot
They designed your life
But true souls said you know what's right
And you can join us on the other side
(Our sideways are broken, Our minds have been twisted. The billboards are lying; the line has
been made. The
streets are all empty, we paved them with zombies. A lost generation, generically
made. Amidst all the madness I saw a flower. A dream that was creepin' I kept in my
sight and then it turned and it took me - an explosion, it sme. Beauty that screams
"I'm alive.")
