

Where I Go When I Drink

Chris Young

There's a barstool downtown
With my name on it
There's a party crowd promising a good time
But I ain't goin'
Used to be I'd be there
Throwin' a couple down
But now one leads to two and two leads to four
And before I know it I'm thinkin' about Standing at the end of the drive
Your tail lights fading in to the night
Screaming your name
In the pouring down rain
Watching you leave us behind
So I don't go out on the town
All the whiskey I had I poured out
My heart needs time to get over you and me
And that's where I go when I drink
Sometimes I feel like I could have a few
But I know better your memory's no quitter
And every time I do I'm Standing at the end of the drive
Your tail lights fading in to the night
Screaming your name
In the pouring down rain
Watching you leave us behind
So I don't go out on the town
All the whiskey I had I poured out
My heart needs time to get over you and me
And that's where I go when I drink One drop
You flood my mind
Like river of goodbye
And I'm standing at the end of the drive
Your tail lights fading in to the night
Screaming your name
In the pouring down rain
Watching you leave us behind
So I don't go out on the town
All the whiskey I had I poured out
My heart needs time to get over you and me
And that's where I go when I drink When I drink
That's where I go
When I drink
