

# Lune

## Periphery

Snow coming down now  
Like December, burning up in the summer rays  
But I'm not stumbling, like a pretender  
Medicine flowing through my veins Heavy eyes like a tongue won't stutter  
Mouths are moving, and this heart's still fluttering  
I'm on my own! You found me at the core now  
I am wrapped within the warmth of your touch  
There's never a moment that I let slip by in your eyes  
Are we growing old day and day?  
Am I melting in the rays of this love?  
Never ever gonna let you go  
Don't let go  
Never gonna let you go Slow it down, now  
I cannot remember why I let them chew on my brain  
Are they coming [?]  
Smoldering embers, bite my [?] I'll die in your light Heavy eyes like a tongue won't stutter  
Mouths are moving, and this heart's still fluttering  
I'm on my own! You found me at the core now  
I am wrapped within the warmth of your touch  
There's never a moment that I let slip by in your eyes  
Are we growing old day and day?  
Am I melting in the rays of this love?  
Never ever gonna let you go  
Don't let go!  
Do you feel the love?  
Yes I feel the love  
Chase it, hold it, feel it, never let it go  
Do you feel the love?  
Yes I feel the love  
Do you feel the love?  
Yes I feel the love  
Chase it, hold it, feel it, never let it go!  
Never let it go!  
Don't let go!  
Don't let go!
