Save the Night

John Legend

A little trouble in the city Trouble in my home She told me love don't live here anymore I wanna run to the light It's too dark in this part of night I need somebody who can make it rightAnd it's on tonight How about we go and save the night I can see you want it and so do i How about we go and save the night Let's save the night I'm not a one man band I want to sing a duet You and me would sound much better You look so good in my bed And if your gonna go out Your gonna go on with a bang Let's save the night i'll be your supermanAnd its on tonight How about we go and save the night I can see you want it and so do i How about we go and save the night Let's save the night I see the night flashing before her eyes Resuscitating bring it back to life And it's on tonight How about we go and save the night I can see you want it and so do i How about we go and save the night Let's save the night Oh, let's save the night Let's save the night
