

Getting Out

Daniel Merriweather

Yesterday I made you cry, it didn't even phase me when
your tears rolled down. I was so convinced that i was
right, that you never even tried to bring me round. And these rules, are getting tangled in my
body, these
rules it's gonna hurt when you pull them out...Look at what you made do, i was only tryin to
save the
world, but i forgot about asking you.
But look at what you made me say, i'm using crosswords
on the radio, telling you to change your ways.
Look at what i've become, thought that i was
everything you dreamed of, but you were dreamin of
getting out, and now i can't get my ass off the couch.
Nicotine and alcohol, anything to fill the hole, cos
it's all too much. There's nothing i can talk about,
of course i'm gonna shut you out. I can hardly blame
you cos you got me stuck yeah yeah. But these rules, are getting tangled in my body, these
rules, it's gonna hurt when you pull them out. look at what you made me do, i was just about to
save
the world when i forgot about asking you. Look at what
what you made me say, i'm using crosswords on the
radio, telling you to change your way.
look at what ive become thought i was everything you
dreamed of, but you were dreamin of getting out, and
now i can't get my ass off the couch Because of you. come angel fly away, angel leave today, but
you never
go, how these rules, got tangled in our body, these
rules, its gonna hurt when you pull them out
But look at what you made me do, i was just about to
save the world when i forgot about asking you. Look at
what what you made me say, i'm using crosswords on the
radio, telling you to change your ways.
look at what ive become thought i was everything you
dreamed of, but you were dreamin of getting out, and
now i can't get my ass off the couch Because of you.
