

# Pro Create (feat. Action Bronson)

## Jared Evan & Statik Selektah

You came to take us All things go, all things go To recreate us All things go, all things go  
We had our minds set All things go, all things go You had to find it  
All things go, all things go  
It started off with a rhyme and a dream  
Made it the greatest and the latest  
Now we fresh on the scene  
Got the sample for the kids  
Won't you ever grow up?  
Went to Drexel and had classes, but I never showed up  
I was writin' all day 'til my hands would hurt  
Professors didn't appreciate it, called me a jerk  
New boy needed to learn, but I never would  
Pay attention in school is something that I never could, uh  
And know with a beat, gotta be steaming  
And we could work wonders over logic and reason  
We on the hype now, they call it a buzz  
And how we get the party popping, Baltimore club, uh  
MySpace they could replay next  
And you gotta have Xaph for the DJ set  
No matter how they re-play us, they can never replace us  
And any way you slice it now, homie, they came to take us  
You came to take us All things go, all things go To recreate us All things go, all things go We  
had our minds set All things go, all things go You had to find it All things go, all things go  
Say hello to the game  
The people know my name  
And do they really love us, or is this just a fling?  
And we be Peter Parker in love with the Mary Jane  
So many people gone, so many people came, eh  
This that brand new spontaneous  
Dope flow, intravenous  
Miscellaneous grinding  
Better late than never, I'm calling it perfect timing  
But we goin' have a little bit of fun  
'Cause when it's all done  
You throw your sneaks up and call it a good run  
I admit, that I would never rather them burn me  
I don't know where I'm headed, but I know it's a journey  
And my bags is packed, so can you hand me my itinerary?  
I get attention like a soldier in the military  
This is what you gotta notice today  
We promise to make sure they never throw us away  
You came to take us All things go, all things go To recreate us All things go, all things go

We had our minds set All things go, all things go You had to find it  
All things go, all things go  
You came to take us  
All things go, all things go  
To recreate us  
All things go, all things go  
We had our minds set  
All things go, all things go  
You had to find it  
All things go, all things go
