

# Once and Forever

Charlie Wilson

Everything I need is what you give to me  
I think it's time we make it official  
Everybody knew right from day one  
Wanted to give you everything and then some  
Inside and out you are so beautiful  
Anytime you gone it feels like too long  
Try to forget how it used to be  
Before you came and made me happy  
You know you inspire me to be a better man  
Some things are never meant to end so Once and forever  
Let's make this last  
We have a chance to be  
Always together from now on  
We right where we belong  
Once and forever  
Listen  
Whisper in my ear baby talk to me  
You tell me everything I do is brand new  
We don't have to wait let's make it there  
Don't you think it's time you should say I do  
I'm open wide ain't even gonna lie  
I never saw it coming how you make me feel inside of my heart  
Before you came along I was half of what I should be You know you inspire me to be a better  
man  
Some things are never  
Never meant to end ohhh Once and forever  
Let's make this last  
We have a chance to be  
Always together from now on  
We right where we belong  
Once and forever  
With you my heart has found a home  
And you will never ever have to be alone  
Be alone  
Never ever ever have to be alone Once and forever  
Let's make this last  
We have a chance to be  
Always together from now on  
We right where we belong  
Once and forever
