

# Let It Go (Laidback Luke Remix)

## Dragonette

Let it go We get a little faded the colors go  
running out of all our clothes  
and the flash dont light when the battery is low.  
Well you can stamp a foot down through the floor  
its a better plan by far  
to blow off the roof and let in the dark  
so we better get started  
if I were you id let it go  
and feel it all over inside like a chemical  
cause to tell the truth I dont know  
if its ever over We don't need a cure for the weight of the world  
cause its floating round in the universe  
just swinging like its tied by a string that you hold  
and let it go  
We could dig a hole right down into  
somewhere as deep as black and blue  
and fill it with a crowd and the sound of right now  
we could carve a tunnel under And found just out how low it goes it goes  
till we run out of dirt on the other side and we see the light  
but if I were you  
id look up  
and find a place there in the sky were there's room enough  
to spread it out  
on the ground  
for where you land when you come down We don't need a cure for the weight of the world  
cause its floating round in the universe  
just swing it like its tied by a string that you hold  
and let it go  
Let it go  
Let it go  
Well you can stamp a foot down through the floor  
its a better plan by far  
to go off the roof and let in the dark  
Let in the dark  
Let in the dark So we better get started, started, stated....  
so we better get started, started, stated.... Let it go (started, stated...)  
Let it go (started, stated...) We don't need a cure for the weight of the world  
cause its floating round in the universe  
just swinging like its tied by a string that you hold  
and let it go  
Let it go

Let it go
